

ANTONY AMAL REKSHIN A

SQL Support Engineer Fresher

6383792232 | antonyamalrekshin@gmail.com | [GitHub](#) | [LinkedIn](#)

Tamil Nadu, India

SUMMARY

Detail-oriented graduate seeking a **SQL Support Engineer** role with strong skills in **MySQL**, **query optimization**, and **database troubleshooting**. Experienced in writing efficient SQL queries, handling backend data operations, and resolving database-related issues. Proficient in **JDBC connectivity**, **debugging**, and **real-time data handling**, with a focus on improving **data accuracy**, **system performance**, and **reliability**.

TECHNICAL SKILLS

Database & SQL : MySQL, CRUD Operations, Query Optimization
SQL Concepts : DDL, DML, DCL, TCL, DQL
Clauses & Joins : SELECT, WHERE, GROUP BY, HAVING, ORDER BY, Joins
Subqueries : Correlated & Non-Correlated Subqueries
Functions : Single-row & Multi-row Functions
Programming : Java, SQL.
Tools : MySQL WorkBench, Git, GitHub, VS Code

TRAINING

Besant Technologies

Java Full Stack Development Training

Chennai

Jan 2025 – Present

- Worked extensively with **MySQL databases** and executed optimized SQL queries.
- Implemented **JDBC connectivity** for backend database interaction.
- Developed backend modules for **real-time data processing**.
- Performed **debugging and troubleshooting** of database-related issues.
- Improved query performance using **basic optimization techniques**.

PROJECTS

Food Delivery System (Swiggy Clone)

Java · JDBC · MySQL

[GitHub](#)

- Designed and developed a **food delivery database system** similar to Swiggy.
- Created and managed **normalized relational database schemas** for users, restaurants, menu, and orders.
- Wrote complex SQL queries using **joins, subqueries, and aggregation functions**.
- Implemented order workflow with **status tracking (placed, preparing, delivered)**.
- Integrated Java with MySQL using **JDBC** for backend database operations.
- Optimized queries to improve **performance and data retrieval efficiency**.

ATM Banking Management System

Java · JDBC · MySQL

[GitHub](#)

- Developed a secure banking application supporting deposits, withdrawals, and transactions.
- Designed and managed **relational database schema** for structured data storage.
- Wrote optimized SQL queries for efficient transaction processing.
- Implemented authentication, validation, and exception handling mechanisms.
- Handled database connectivity issues and performed debugging.

Student Management System

Java · JDBC · MySQL

[GitHub](#)

- Built a CRUD-based system with Add, Update, Delete, Search, and View functionalities.
- Integrated Java with MySQL using **JDBC** for database operations.
- Designed normalized database schema for efficient data management.
- Applied **OOP principles** and Collections Framework for structured development.

EDUCATION

St. Mother Theresa Engineering College

Bachelor of Engineering (Computer Science Engineering) | CGPA: 8.05

Nov 2022 – Present

Tamil Nadu
