

Kannan K

Cloud Security & Infrastructure Fresher

+91-9080986643 | kannank1718@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year CSE student certified in Google Cloud Cybersecurity and AWS Academy Cloud Architecting. Trained in threat detection, incident response, IAM, VPC networking, and AWS infrastructure design. Built cloud-oriented projects applying security monitoring, IAM policy design, and scalable cloud architecture. Eager to contribute to enterprise cloud security and infrastructure operations.

CERTIFICATIONS

Google Cloud Cybersecurity Certificate 5 Courses Issued by Google Cloud Badge: credly.com/badges/f1aeb4d8-4a30-4a77-948e-605ee94dace5	2025
AWS Academy Graduate — AWS Academy Cloud Architecting 60 Hours Issued by AWS Badge: credly.com/go/p7vHXjvY	Jul 2025

TECHNICAL SKILLS

Cloud Platforms: Google Cloud Platform (GCP), Amazon Web Services (AWS)

Cloud Security: Security Command Center (SCC), Cloud IAM, Cloud Firewall, Cloud Logging, Threat Detection, Incident Response, Risk Management, AAA Framework, Vulnerability Assessment

Cloud Architecture: EC2, S3, VPC, IAM, RDS, CloudWatch, Auto Scaling, Elastic Load Balancing, CloudTrail, High Availability, Fault Tolerance, Disaster Recovery, AWS Well-Architected Framework

DevOps & Infra: Docker, CI/CD Pipelines, Git, GitHub, Linux, Bash Scripting

Networking: VPC Design, Subnets, Security Groups, Firewalls, NACLs, DNS, Load Balancing

Programming: Python, SQL, Bash — cloud automation and infrastructure scripting

PROJECTS

Cloud Security Monitoring & Threat Detection | GCP · Security Command Center · Cloud Logging · Cloud IAM

- Simulated a GCP security monitoring environment using Security Command Center (SCC) to detect misconfigurations and threats; configured Cloud Logging dashboards with automated alerts applying incident response workflows.
- Implemented Cloud IAM least-privilege policies with role-based access separation, enforcing AAA framework principles to reduce attack surface across simulated cloud environments.

Highly Available AWS Cloud Infrastructure | AWS · EC2 · VPC · Auto Scaling · ELB · S3 · RDS · CloudWatch

- Architected a multi-tier AWS infrastructure across multiple Availability Zones using EC2, Elastic Load Balancing, and Auto Scaling Groups following AWS Well-Architected Framework pillars of reliability and security.
- Designed a secure VPC with public/private subnets, NACLs, Security Groups, and NAT Gateway; configured RDS Multi-AZ with CloudWatch alarms for fault-tolerant operations and disaster recovery.

IAM Policy Design & Cloud Access Control | GCP · AWS · IAM · RBAC · CloudTrail · Python

- Designed IAM policies across GCP and AWS with custom roles, service account permissions, and policy conditions — audited via Cloud Logging and AWS CloudTrail for compliance with AAA framework principles.
- Documented risk assessments and vulnerability findings with remediation recommendations aligned to GCP and AWS security best practices.

EDUCATION

Bachelor of Engineering in Computer Science St. Mother Theresa Engineering College, Tuticorin, Tamil Nadu CGPA: 8.3 / 10.0	2022 – 2026 (Expected)
